

ABDULLAH

Volunteering @ VBD, SJF | Bug Hunter @ ACS, Ronon | Cyber Security, API Development
abdullahnajib5@gmail.com • <https://www.linkedin.com/in/abdullah-m-nazif/> • <https://abdullahbd.me> • Bangladesh

OBJECTIVE

Aspiring aerospace engineer with a strong foundation in science, cybersecurity, and innovation. Passionate about contributing to space-based solar energy systems and solving global challenges through technology and sustainable design.

Key Achievements

2nd Place in Science Fair

Built a system to detect accidents and send GPS-based alerts to nearby emergency services—every second counts.

Got Invitation in Walton HQ

Reported a security bug to Walton, one of Bangladesh's top tech companies and was invited to their HQ to help fix it.

Threat Detection Boost

Increased cybersecurity threat detection by 35% within 11 months through advanced monitoring tools.

API Integration Success

Led API development team to integrate 15 new APIs, enhancing service efficiency by 40%.

Startup Growth Leader

Founded Nittii, Khyap, GasBottleBD, achieving 200% user growth within first year of operation.

Leadership & Volunteering

Coordinated ICT-related projects and have been volunteering for 7 years

Experience

ACS

Cyber Security

It's a top e-learning platform in Bangladesh

- Hunted Bug

Remote

01/2023 - 07/2024

Ronon

Cyber Security

It's a top e-doubt solving platform in Bangladesh

- Bug Hunting

Remote

01/2023 - 07/2024

GasBottleBD

Co-Founder

GasBottleBD (a company where you can order cylinder gas or LPG cylinders online in Bangladesh)

- Served around 10k customer in Tangail City in 6 months. But we were unable to break the market syndicate and had to stop.

Tangail District, Bangladesh

2022 - 2023

Nittii

Co Founder & Product Developer

SaaS Product to help who sells products and service through Social Media

- We ran this for 1 year then stopped for financial problem (We were running it with our pocket money)

Remote

2023 - 2024

Khyap

Co Founder and Programmer

Ride Share platform but only using messenger, could operate without internet.

- We ran this for 1 year then stopped for financial problem (We were running it with our pocket money)

Remote

2023 - 2024

Education

Bindubasini Govt Boy's High School SSC, Science GPA: 5.0 / 5.0	01/2017 - 01/2022
Major General Mahmudul Hasan College HSC, Science GPA: 5.0 / 5.0	01/2022 - 01/2024

Projects

Road Accident Detector	Tangail 2021
------------------------	-----------------

We presented a project designed to automatically detect road accidents and send emergency alerts to the nearest hospital and fire service with precise GPS coordinates. The idea was simple but powerful: in critical moments, time saves lives.

I'm proud to share that this project was awarded 2nd place in the district!

Project Highlights:

- # Real-time accident detection using sensors
- # Automated alert system via SMS with exact location data
- # Aim: Minimize response time, maximize survival chances

This experience helped me realize how technology, when applied with empathy and purpose, can create real-world solutions that matter.

Khyap (Offline Ride-sharing Utility Project)	Remote 2023 - 2024
--	-----------------------

Khyap was a ride-sharing system based on Facebook. Anyone could use this system with their Facebook Messenger. Just had to need to send a message, and the rider would contact them, because Messenger can be used without any internet cost, so the system operated entirely via Facebook Messenger, usable even without mobile data access. I was co-founder, programmer and product manager here.

Nittii (Startup Initiative)	Remote 2023 - 2024
-----------------------------	-----------------------

Nittii was a sales management system. One should connect their Facebook business with us, then Nittii would make a website automatically in an instant, and it has an order management system, automatic order placement in a courier service system. The awesome thing was that Nittii was able to chat with customers by itself using AI (Artificial Intelligence). Customer can ask anything about a product and can order it in Messenger, with no other hassle. I was co-founder and product manager here.

Certification

edX Verified Certificate for Introduction to Aeronautical Engineering	— by Delft University of Technology.
Certified Ethical Hacking Masterclass in Bangla	— Issued by MSB Academy
Become A Master In Ethical Hacking With Android	— Issued by MSB Academy

LEADERSHIP & VOLUNTEERING

Shishuder Jonno Foundation

Information Technology Project Coordinator

06/2018 - Present

At 17, while still in high school, I coordinated ICT projects under the Shishuder Jonno Foundation, leading university-level volunteers. I built an AI bot that structured news data for internal use, contributing to the success of child drowning prevention campaigns.

Volunteer for Bangladesh

General Member

06/2025 - Present

All kind of Community Services like:- Planting Trees, Cleaning Areas, Helping Traffic Control, Making Awareness About Climate, Helping People During Flood etc..

Skills

Cyber Security/Ethical Hacking: - Bug Hunted in Walton, ACS, Ronon etc.,,

API Development & Programming:- API development with PHP. Programming Language. Used this skill in Nittii, Khyap, Workhu.

Startup Development:- Nittii, Khyap, GasBottleBD, Workhu.

Product Development:- Nittii, Khyap, Workhu, GasBottleBD.

Volunteering:- Information Technology Project Coordinator at Shishuder Jonno Foundation, General Member at Volunteer for Bangladesh.

Robotics & Arduino:- I used this skill in Science Fair 2021.
